Multiple Variable Regression — Introduction

Practice Assignment • 10 min

Due Jul 20, 11:59 PM +07

Your grade: 100%

Your latest: **100%** • Your highest: **100%**

To pass you need at least 80%. We keep your highest score.

Next item →

1. Suppose that the number of houses constructed, *Houses*, depended on both the *Interest_Rate* and *Income*. 1 / 1 point

Which of the following would be true?

- [x] A graph of Income on the horizontal axis versus Houses on the vertical axis would show a positive relationship.

  ✓ Nice work

  Yes, this is correct.

- [ ] A graph of Income on the horizontal axis versus Houses on the vertical axis would show a negative relationship.
- [x] A graph of the Interest Rate on the horizontal axis versus Houses on the vertical axis would show a negative relationship.

  ✓ Nice work

  Yes, this is correct.

- [ ] A graph of the Interest Rate on the horizontal axis versus Houses on the vertical axis would show a positive relationship.

2. Suppose that the number of houses constructed, *Houses*, depended on both the *Interest_Rate* and *Income*. Suppose the regression equation that is used to forecast is: 1 / 1 point
